Exporting PDF's

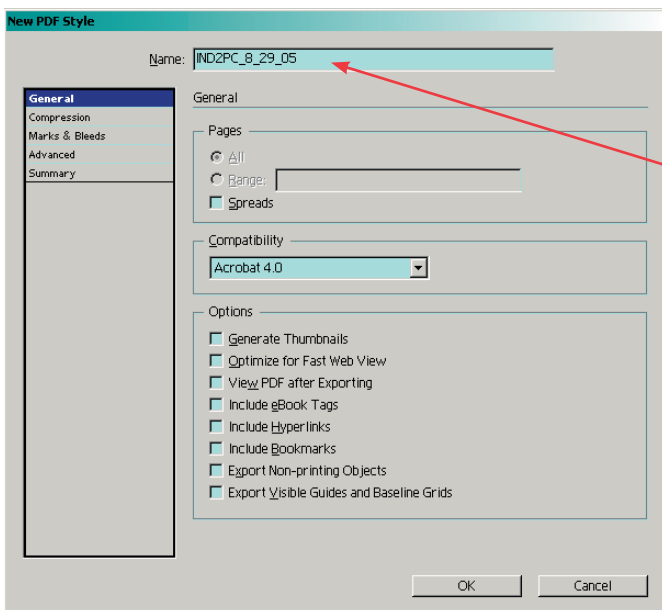

Step 1

Choose "PDF Styles" from the file menu.

Step 2

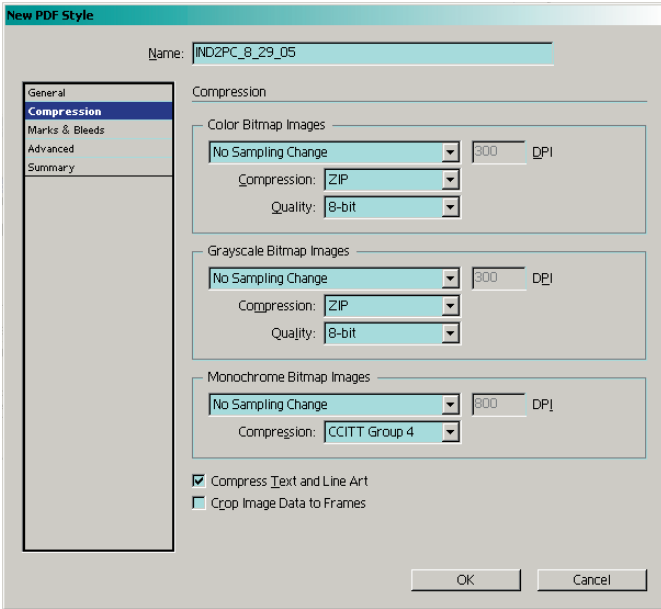

You can either choose to create a "New" preset or "Load" an existing preset.

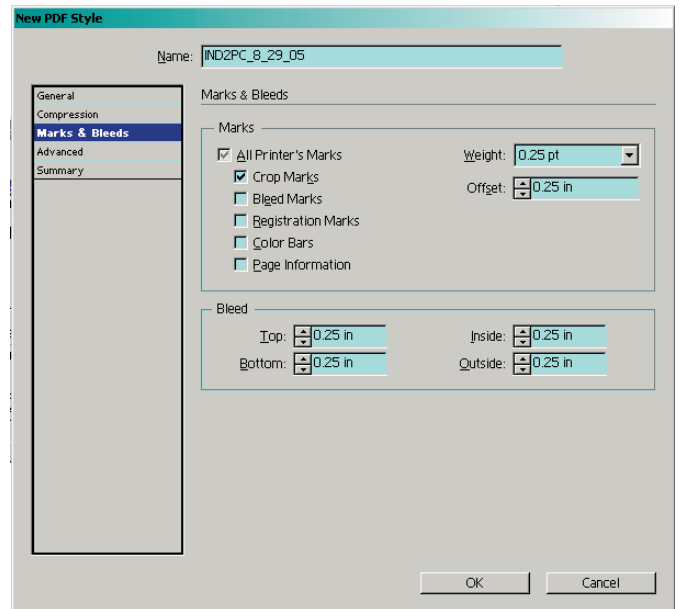

Step 3

If you are creating a new preset, make sure to give it a name.

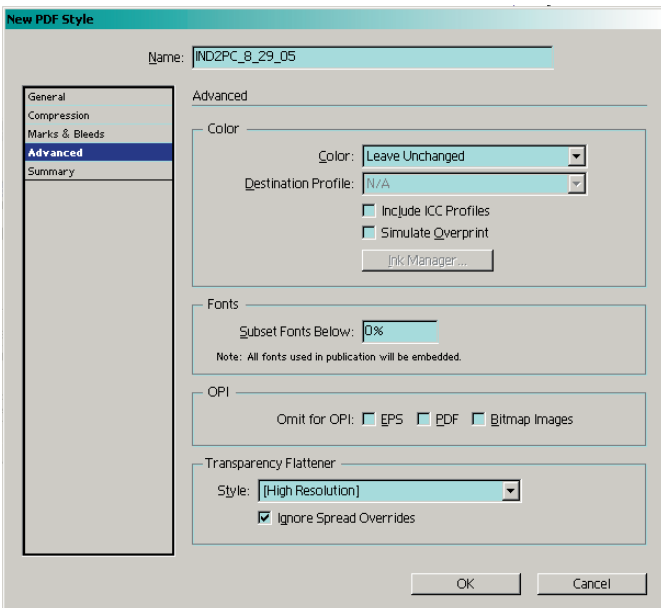

Step 4

Step 5

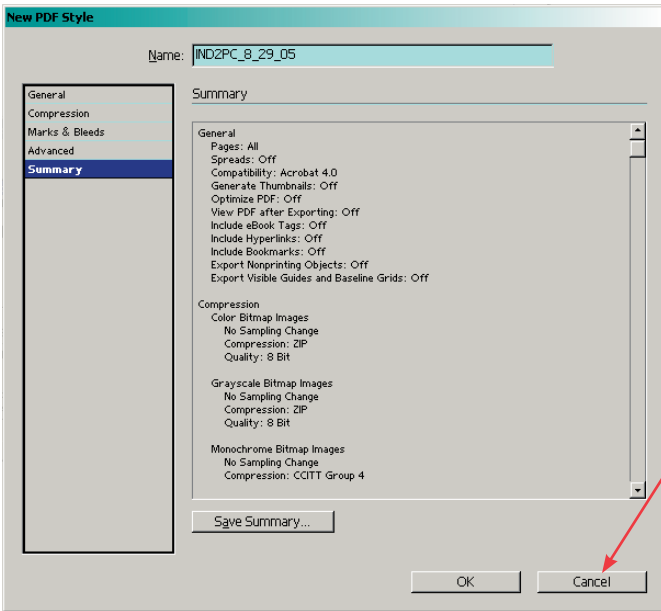

Step 6

Step 7

Select "OK"

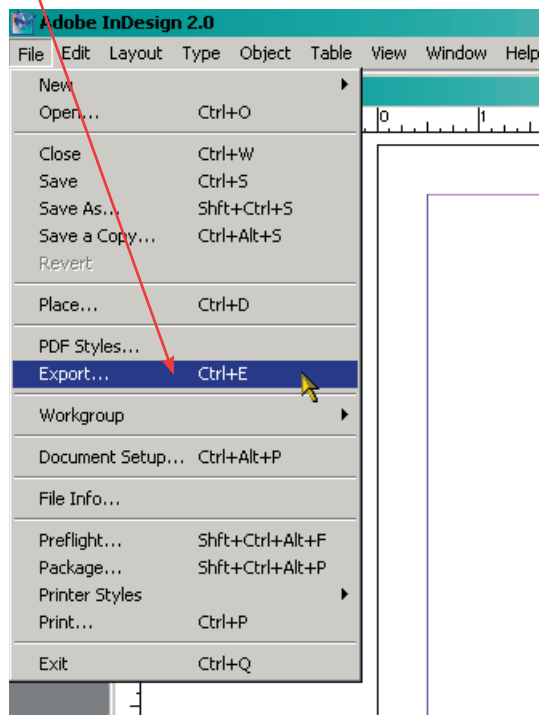

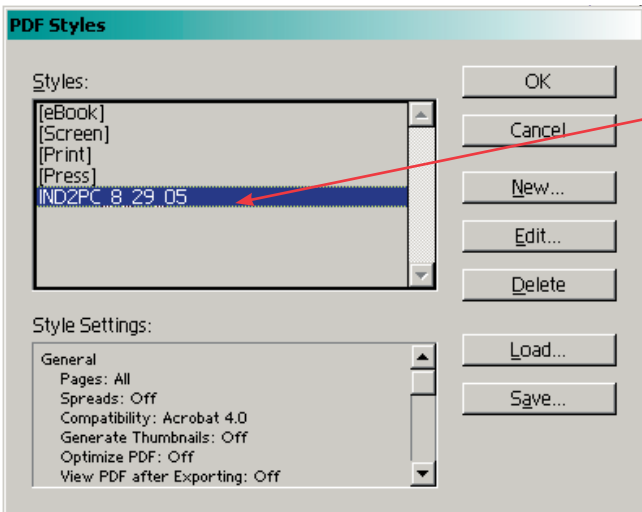

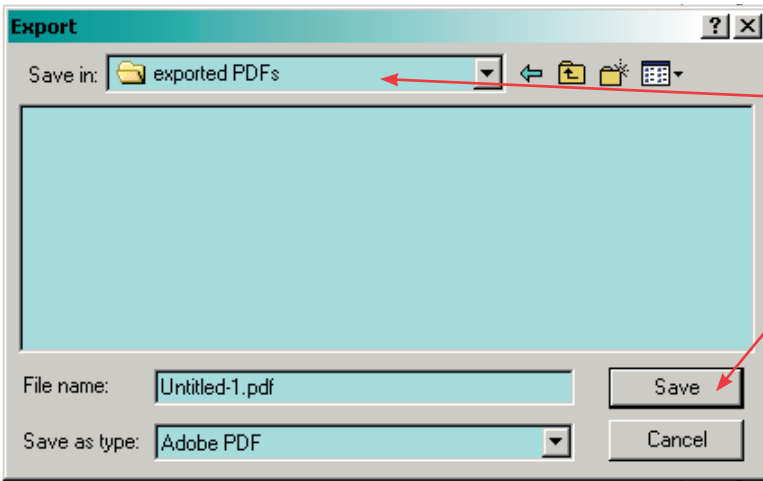

Step 8

Your preset should now appear in the list.

Select "OK". Your preset will remain in the listing until removed.

Next, select "Export" from the file drop down menu.

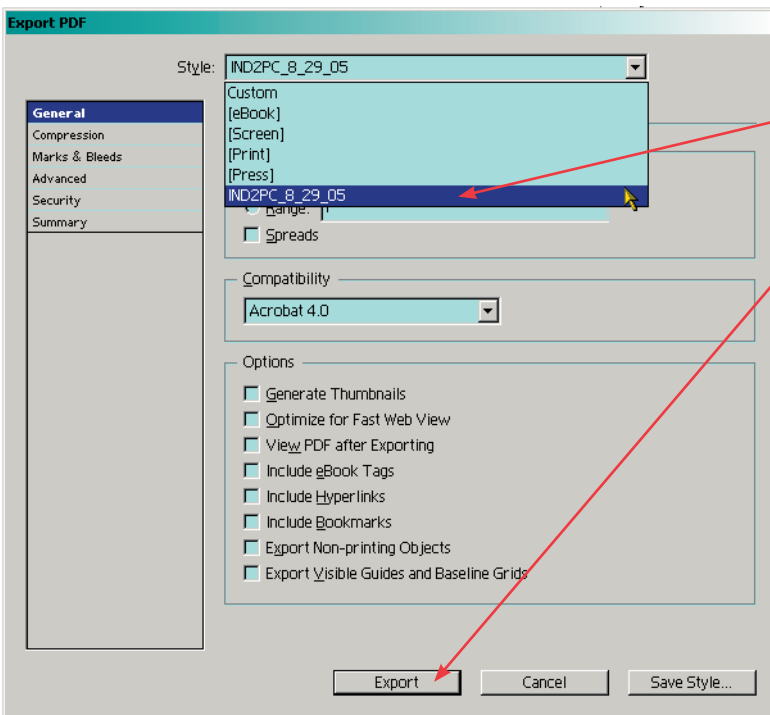

Step 9

Select a location to save your file.

Enter your file name and click save.

Step 10

Select your preset.

Click on "Export".
