Exporting PDF's

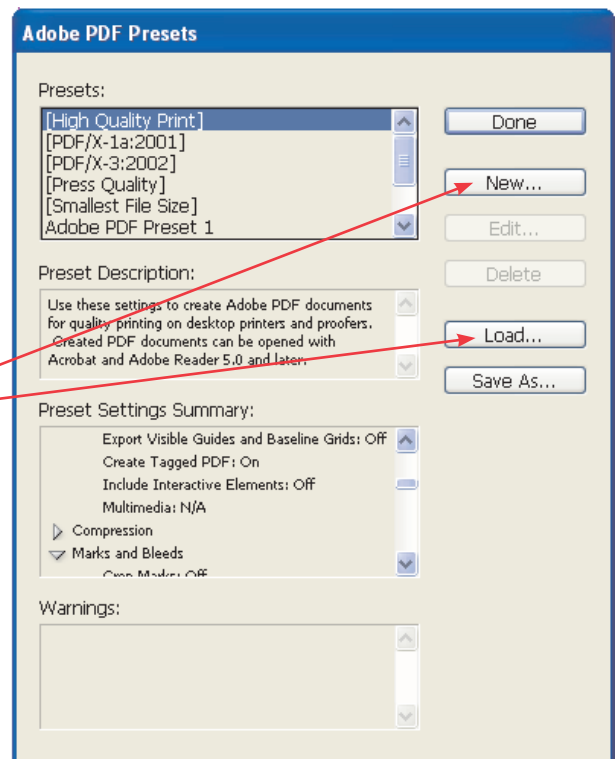

Step 1

Choose "PDF Export Presets" from the file menu and select "Define".

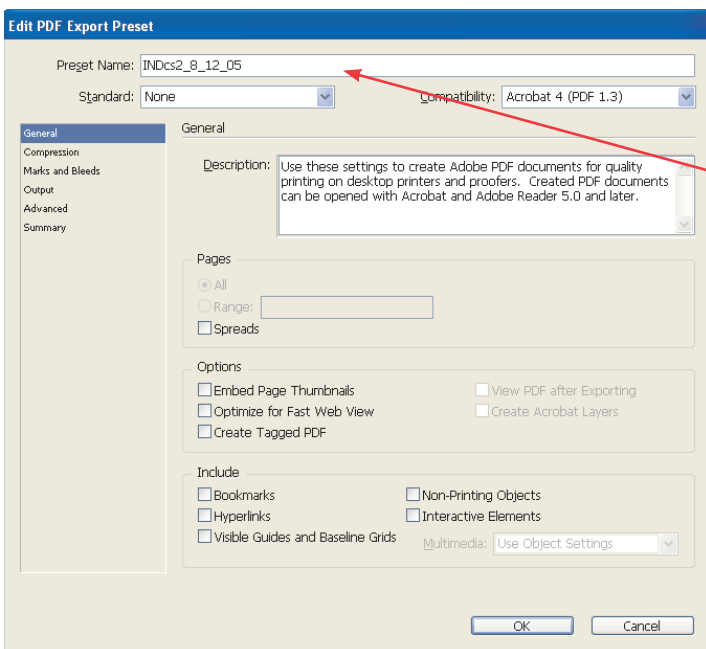

Step 2

You can either choose to create a "New" preset or "Load" an existing preset.

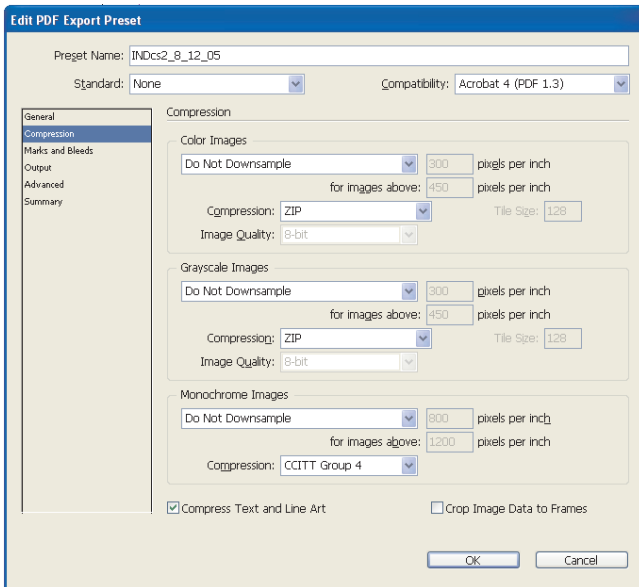

Step 3

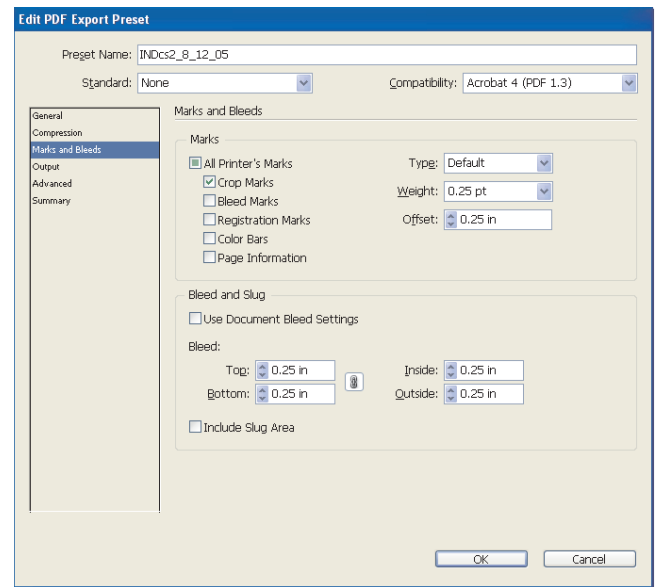

If you are creating a new preset, make sure to give it a name.

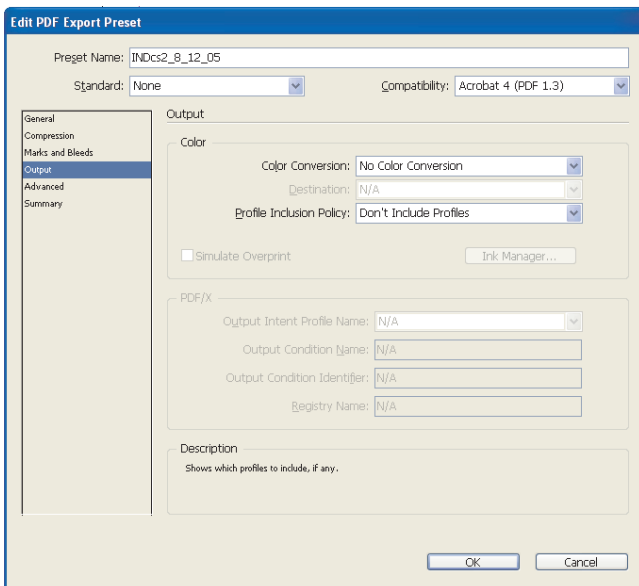

Step 4

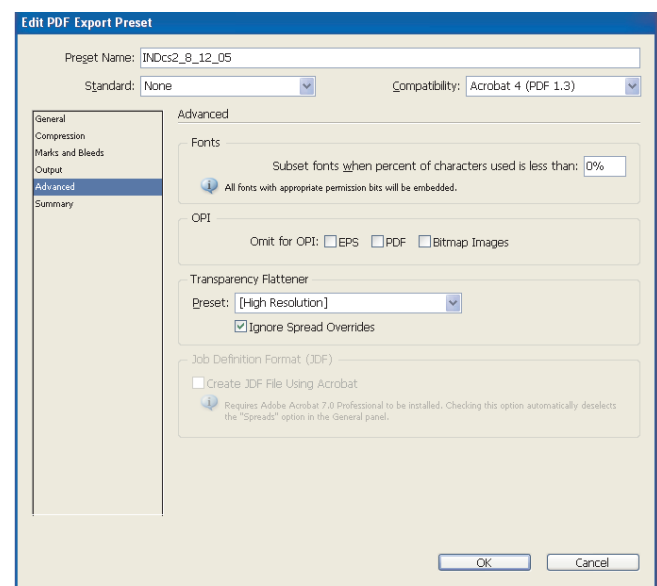

Step 5

Step 6

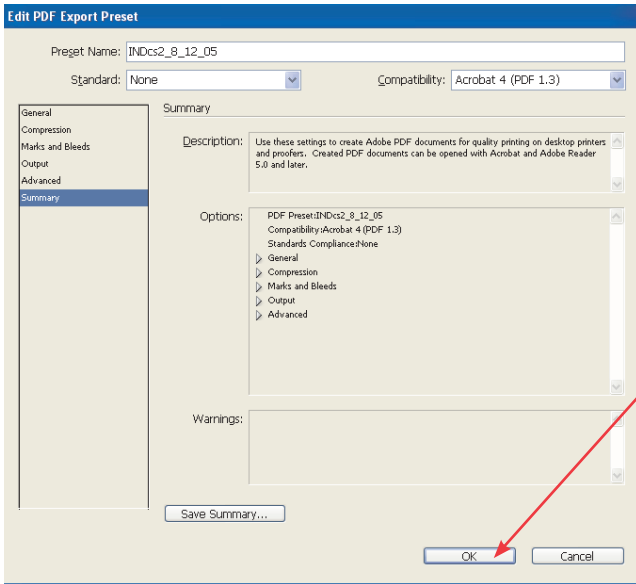

Step 7

Step 8

Select "OK"

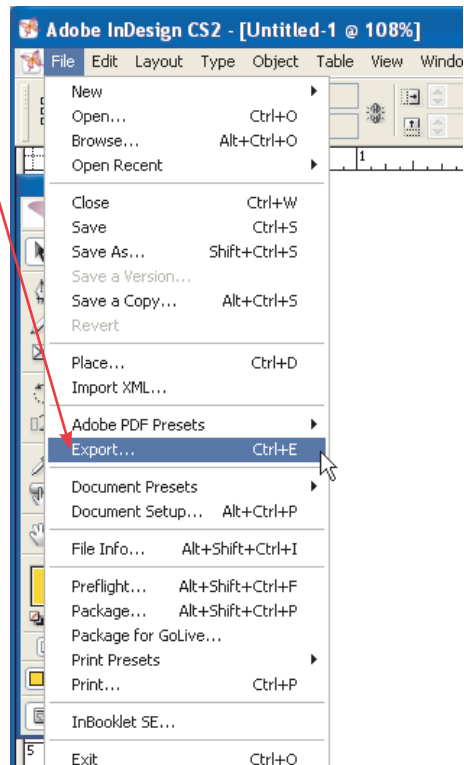

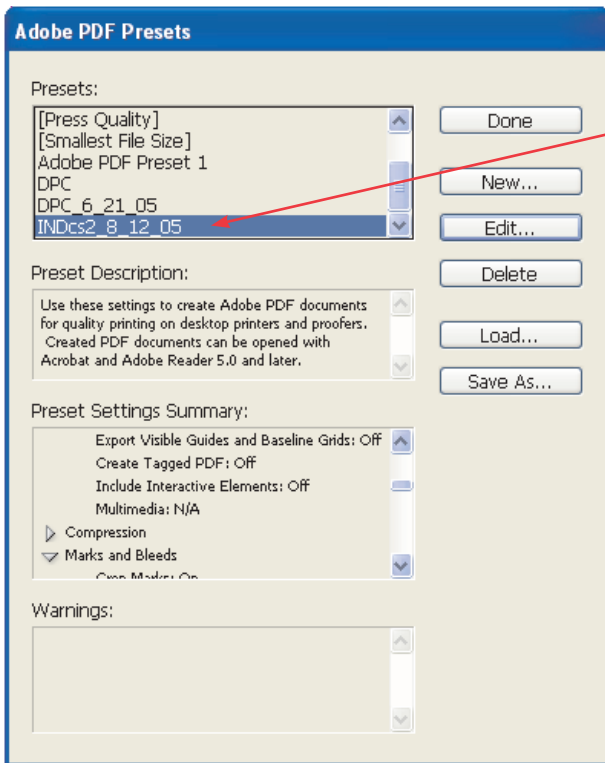

Step 9

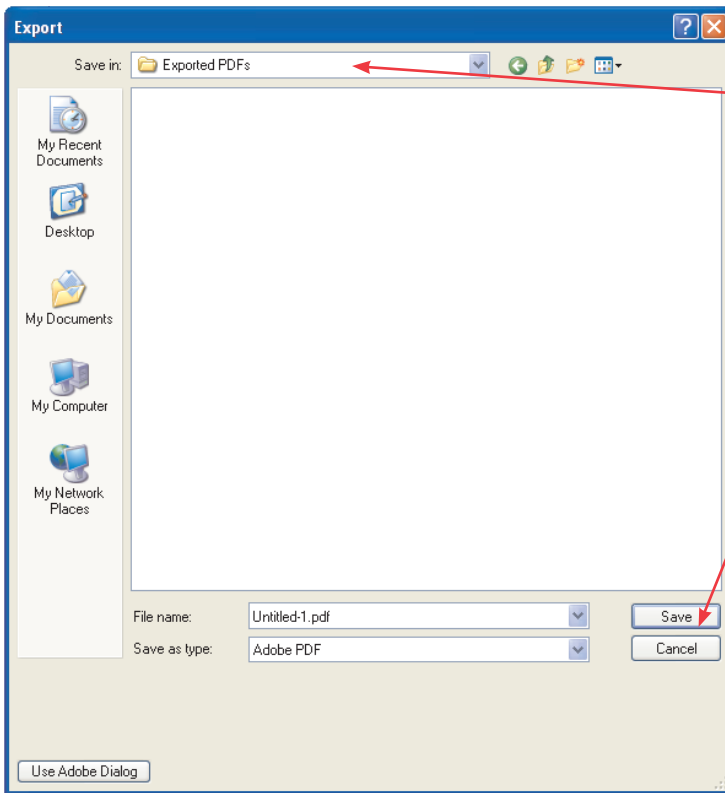

Your preset should now appear in the list.

Select "Done". Your preset will remain in the listing until removed.

Next, select "Export" from the file drop down menu.

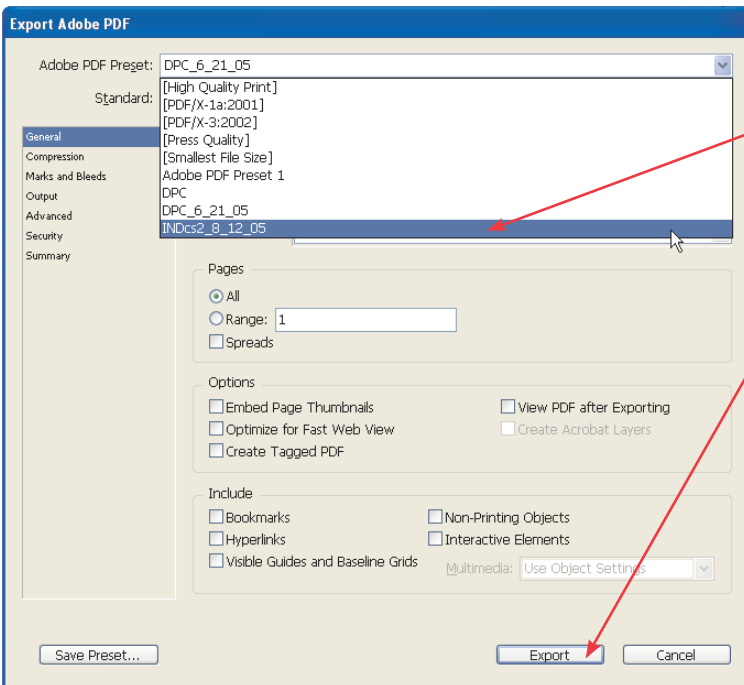

Step 10

Select a location to save your file.

Enter your file name and click save.

Step 11

Select your preset.

Click on "Export".
