

PageMaker 7 PC Printing PostScript

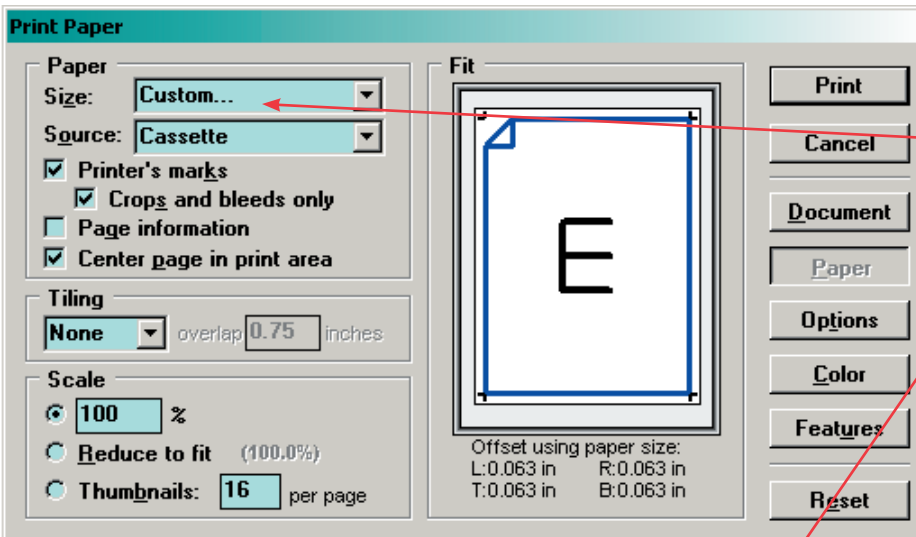

Step 1

Go to "Print" under the file menu.

Select the PostScript Printer and the Acrobat Distiller ppd.

Enter the pages you want to print.

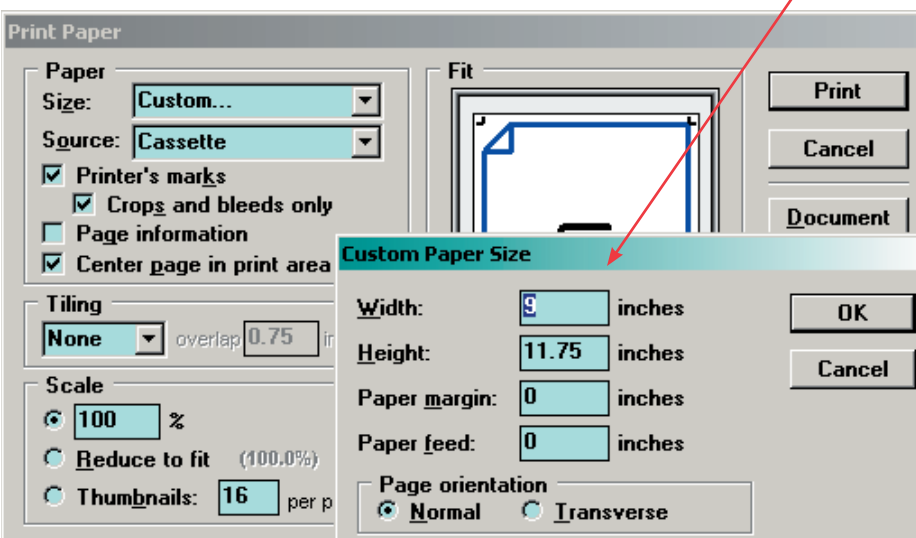

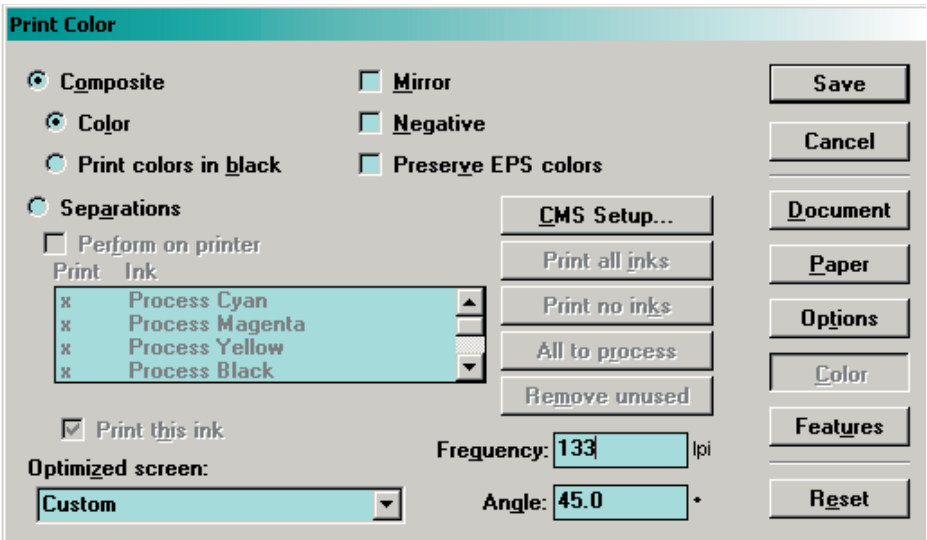

Step 2

After matching the screen capture, select "Custom" paper size.

A window will pop up. The width and height should be 7/8" larger than your trim size to allow for the crop marks.

A magazine with a trim size of 8 1/8" x 10 7/8" will have a custom paper size of 9 x 11.75".

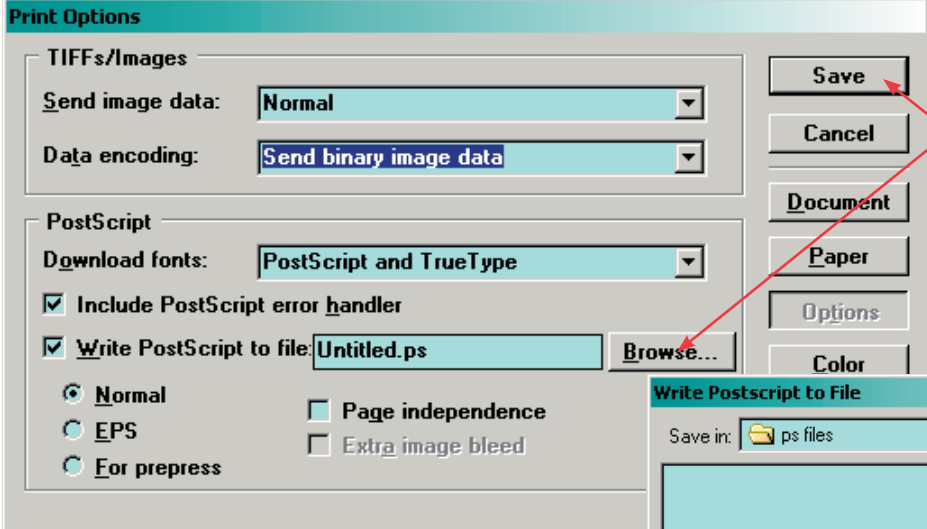

Step 3 (Skip the options tab. It will be the last setting).

Step 4

Step 5

Click on "Browse" to select where your PostScript file will go.
Click "Save" and then save again.
